Experience in the treatment of 20 patients is reported.
Twelve of these patients had previously been treated
with sulfones, to which most had been intolerant. A
daily beginning dose of 500 mg was increased by 500 mg
each week to a maximal dose in some cases of 3 g.
Tolerance was good. The patients not previously
treated showed best results (flattening and absorption of
the lepromata, regression of infiltration of plaques,
regression of spots). Case histories are included.

DESCRIPTORS: *Sorbic acid, Synthesis, Stability,
*Purification, Recrystallization, Distillation, Anti-
oxidants, Food, Preservation.

The invention involves a method for the preparation of
pure and simultaneously stabilized sorbic acid
characterized by the fact that the crude sorbic acid
is purified in the presence of 0.0002 to 3wt.% of a
